

# Ultra HumiMax

Product suitable for use in Organic Agriculture conforming to NCP Regulation approved by ECOCERT de France

For Organic Use

## More Information

Ultra HumiMax is a type of Potassium Humate organic fertilizer derived from Leonardite, and can be used for foliar spray and drip irrigation. It has the necessary nutrients to improve crop quality and yield in both flake and powder form.

## Composition / Analysis:

APPEARANCE	BLACK SMALL FLAKE
Humic Acid (Dry Basis)	80%
Water Solubility	100%
Potassium (As K <sub>2</sub> O)	10%
PH Value	9-11
Loss on Drying	≤ 1%
Moisture	≤15%

## Application

Suitable for all agricultural crops, fruit trees, landscaping, gardening, pastures, grains and horticultural crops, etc.

Soil Application: 8- 12kg/ha, Irrigation: 8- 12kg/ha

Foliar Application: 5-8kg/ha with the dilution rate of 1:600-800

## Benefits

- Increases organic matter of soil
- Improves crop respiration and photosynthesis
- Improves potash fertilizer utilization
- Slows decomposition to increase the release of potassium
- Improves the content of available K
- Long-lasting and fast-acting
- Enhances water holding capacity of soil
- Reduces soil erosion and improves workability of soil
- Regulates the release of nutrients
- Improves the quality of agricultural crops
- Improves efficacy of Herbicide
- Improves the efficiency of fertilizer

## Packaging

1kg, 5kg, 10kg, 25kg per bag
